

Fit & forget CS technology for optimised rigid truck applications

Benefits

- Maximised payload and profits with up to a 30% weight saving on the Edbro CS range
- The fastest tipping speeds on the market for optimum site turnaround times
- No down-time worries with the ultimate reliability of an Edbro fit and forget product

Features

- Unique one-piece tube construction and laser welding techniques increase the Edbro weight advantage
- Increased stop contact faces allow for faster tipping
- The Edbro complete kit concept optimises all areas of your hydraulic application with a full range of unbeatable high performance products

CS Series

Technical Data

Model Code	Nominal truck GVW (t)	Nominal lift capacity (t)	Nominal body length (m)	Average kit weight incl. oil (kg)
CS11	18	16	4-5	382
CS13	26	22-23	5-6	442
CS15	32	30-35	6-7	500

Average kit weight includes PTO/pump. Kit weight may vary according to chassis installation.

This table is only an illustration of the range available. Contact Edbro for more details.

Engineering excellence

At Edbro we offer unrivalled application engineering support and in-depth product knowledge that only comes from decades of industry experience.

Our highly skilled engineers can offer the optimum product for your application to maximise operating payload and ensure ultimate safety in operation.

Extensive research combined with testing in the most arduous environments ensures the best on the market for reliability and performance in any situation.
