JHS 2020 B
High-performance lubricant

NEW!

Proven high-performance lubricant now organic

Advantages
• Biodegradable
• Eco-friendly
• Minimal consumption
• Excellent lubricating properties
• Temperature-resistant
• High adhesion on metal surfaces
• Minimal water absorption

Applications
• For refilling the JOST LubeTronic 5Point
• Ideally suited for the manual lubrication of all fifth wheel couplings, king pins and ball bearing turntables

Technical specifications
• NLGI grade 1-2
• Temperature range –40°C to 100°C
• Drop point > 140°C
• Rapid biodegradability in accordance with OECD 301 B

Item no. SKE013440000
Content: 2 x 400 g

LubeTronic 5Point

- LubeTronic 5Point is a central lubrication system for fifth wheel couplings.
- The quantity of grease dispensed remains constant, providing reliable lubrication for the fifth wheel coupling plate and the lockjaw (after initial greasing).

Note on refilling

- Lubricant dispensing intervals for fifth wheel coupling can be set for use in:
  - long distance haulage – 1 year
  - construction traffic – 6 months

The new organic high-performance lubricant can be mixed with the conventional JOST lubricant during refilling. The guarantee excludes the use of other types of grease!
